

This is a test of the upcoming prayer list.

In pdf form anyone can open, view it in a browser, and more easily print it out, save it and put it in their prayer closets etc.

This way it is not just browser viewable.

It can be edited, decorated, styled however you wish. It is done with adobe acrobat pro. This is plain for example only.

It also opens in a new browser tab so that the user is not removed from the website and can just be closed when finished. When closed the user is once again seeing the web site tab.
